Profile

As a senior Computer Science student, my short-term goal is to seek opportunities that enhance the ability of applying my academic skills and content to real-world experiences. Over time, I want to contribute to the technological innovations by learning novel techniques to implement efficient code and ensure stable design architecture.

Skills

Languages:

- Java
- C
- HTML5
- CSS3
- JavaScript
- JQuery
- Angular.js
- Express.js
- Node.js
- Python

Other Tools:

- GitHub
- FireBase
- jdbc
- Selenium
- Native Script
- MongoDB
- PostgreSQL
- npm
- IF-THIS-THEN-THAT Platform (IoT)
- Bootstrap

Education

Bachelor of Computer Science – *York University*   *Sept 2016 – April 2020*

Related Courses: Algorithms & Data Structures, Database Systems, Mobile Applications Software Design

Experience

Android Developer – P*arking Legends*   *Sept 2019 - Present*

- Designed, developed & deployed the "VideoRecorder" Application
  - This app allows you to record videos from your smartphone camera
  - You can use your smartphone as a dash cam and once the recording starts the app will continue to record in the background
- Leading the app release management for the firm

Major Project

Open Chat   *July 2019*
